+44 (0)115 976 6557

Tim leads the firm's commercial services practice for insurance clients. He works with a number of leading insurers and intermediaries on policy drafting and distribution, compliance and commercial issues. Tim was recognised in The Lawyer's 'Hot 100' for 2022 for his ground-breaking work on the readability of insurance policies.

Tim specialises in advising clients who design and distribute insurance products. He heads up the firm's specialist policy drafting and distribution team, which has drafted thousands of insurance policies for the firm's insurer clients and tens of thousands of bespoke policy clauses through its outsourced endorsement drafting service. The team is particularly well known for its academic study with the University of Nottingham into the readability of insurance policies, which showed it is possible to reduce the reading of policy wordings by upwards of 10 years by applying specific drafting techniques.

Tim also advises insurers and intermediaries on commercial and regulatory issues relating to the distribution of products, including compliance with the Insurance Distribution Directive, the FCA Handbook, CASS and SMCR.

Tim applies his in-depth knowledge of product distribution to corporate transactions. Tim regularly advises clients on compliance issues relating to the acquisition or disposal of regulated intermediaries, having advised on over 60 such transactions in recent years.

Tim is well known in the insurance market and regularly publishes articles in the insurance press and speaks at conferences and events.
