

# Shared Insights safeguarding forum: Focus on self-neglect

📍 Online

📅 17 June 2025

In this session we will address the complex issue of self-neglect in health and social care settings using compassionate interventions.

We will focus upon the safeguarding issues that arise as a consequence of a patient's lack of self-care and provide some practical advice on how to sensitively approach and address this difficult issue. We will also consider matters surrounding the individual's mental capacity to make decisions in respect of their care and support (including support to address hoarding behaviours) and the ways that practitioners can ensure they are appropriately addressing and recording the interventions and support these individuals may require or can be offered.

Additional speakers will be confirmed shortly.

Delegates will have the opportunity to share challenges and examples of best practice and put questions to the speakers as part of this discussion.

This event is for in house legal teams, senior leaders, clinicians and professionals working in the health and care sector.
