

Automotive webinar - EV charging points: contractual and liability issues to be aware of

30 December 2022

This webinar looks at some practical contractual and liability issues involved in installing, owning, operating, maintaining electric vehicle charge points.

Whether you're an EV manufacturer; a housing developer or business owner providing a select group with "private" EV charging; or a retail business or service station helping to meet "public" charge point needs, we will explain some of the legal challenges of EV charge point projects. We aim to equip you with a list of practical points to look into when considering installing/operating an EV charge point and some suggested solution.
